WEB DEVELOPMENT PROJECTS

Waywayfar | August 2017

https://waywayfar.herokuapp.com/

A MERN stack application with full CRUD functionality. This app allow users to create and share posts about their favorite destination city. Post can consist of a description and a photo. I collaborated with a team of three other full-stack developers. Our team used the Agile software development method. My focus on this app was the backend and database, and front-end forms, and css styling.

Ponder | August 2017

http://ponder-blog.herokuapp.com/

A Ruby on Rails application with full CRUD functionality. This app is a microblogging platform that allows users to post text in 1000 characters or less. I collaborated with a team of two other full-stack developers using the Agile software development method.

WORK EXPERIENCE

San Francisco Estuary Institute
2007 - March 2017

Graphic Designers
